-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 June 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-3 and 6-10 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Specht et al. (US 6290159) in view of Industrial Solid-State Electronics Book.

Specht et al discloses a seat belt retractor having substantially all the claimed features. The embodiment of figure 2 should be noted (see also column 2, first paragraph). Since the motor is described as being a variable energy absorber (column 4, line 21), it is deemed inherent that the motor is variable in torque/speed which is usually effected by a variable resistor such as a rheostat in series with the motor or, alternatively, the provision of rheostat in series with the motor to variably control the motor would have been obvious to a person having ordinary skill in the art as such is old and well known as discussed on pages 512-515 of the above book (see fig. 13-1). A gear train is deemed inherent such as in the coupling 20/21 or, alternatively, the provision of a gear train to couple the motor shaft to the spool would have been obvious to a person having ordinary skill in the art. The generated force is indirectly based on the weight of the occupant since the force exerted on the belt evaluated in evaluating device 26 is deemed proportional to the weight of the occupant.

Claims 4, 5, and 11-18 are allowed.

Applicant's arguments filed 6/30/05 have been fully considered but they are not persuasive.

As noted in the rejection above, pages 512-515, especially fig. 13-1, of the book Industrial Solid State Electronics, is cited to support the examiner's assertion of old and well known.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

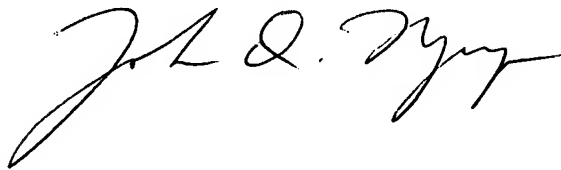

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Q. Nguyen whose telephone number is (571) 272-6952. The examiner can normally be reached on Monday, Tuesday, Thursday, and Friday, from 7:00 AM to 4:30 PM. The examiner can also be reached on alternate Fridays.
